EDUCATION

New York University – Tandon School of Engineering
M.S. in Cybersecurity | Cyber Fellows Scholarship | GPA: 3.89

Brooklyn, NY
May 2027

Rochester Institute of Technology
B.S. in Cybersecurity | Minor in Web Development | Immersion in Economics

Rochester, NY
May 2024

WORK EXPERIENCE

EXECUTIVE CHAMBER CYBER INTERN

NYS Chief Cyber Office

New York, NY
Feb 2026 - Present

- Coordinated with state agencies to facilitate the NYS Cyber Survey, mapping CIS Controls v8.1.2 across IT and OT domains; built R and Python automation tools that auto-generated compliance reports and a dashboard, reducing manual reporting time by ~50% across 98 agencies and enabling direct follow-up coordination with agency stakeholders.
- Authored weekly threat intelligence memos and AI policy research reports briefed to the Governor and Director of Security & Intelligence, covering emerging cyber risks, disinformation, and critical infrastructure.
- Produced a critical-infrastructure regulatory framework across 11 sectors, mapping NYS statutory authorities to close federal oversight gaps (e.g., post-CFATS) against active OT/PLC threat campaigns.

INFORMATION SECURITY INTERN

Rochester Institute of Technology

Jan 2023 – Apr 2023
Rochester, NY

- Integrated Rapid7 with ServiceNow to automate vulnerability management and security operations, reducing manual monitoring tasks by 30% and improving response time to threats by 20%.
- Conducted security assessments and vulnerability scans using tools such as Nessus and OpenVAS, identifying and mitigating potential risks.
- Assisted in the development and implementation of security policies and procedures, supporting ongoing cybersecurity awareness and training initiatives.

JR. APPLICATION ADMINISTRATOR INTERN

Rochester Institute of Technology

Aug 2022 – Dec 2022
Rochester, NY

- Managed ServiceNow applications, performing software updates, bug fixes, and customizations to optimize system performance.
- Collaborated with cross-functional teams to integrate ServiceNow workflows, streamlining operational processes and improving data accuracy.
- Developed documentation and standard operating procedures to support future platform maintenance and team onboarding.

PROJECTS

NYCPS Cybersecurity Risk Assessment - [GITHUB](#)

Fall 2026

- Authored a 15-page open-source risk assessment of the largest U.S. school district (900K+ students, 700+ third-party data vendors), translating the NYS Comptroller's 2026 audit, disclosed breach history, and K-12 threat research into a prioritized risk register.
- Rated findings with FIPS 199 impact levels, STRIDE threat modeling, and MITRE ATT&CK, mapped against NIST CSF 1.1 and 8 NYCRR Part 121 / FERPA obligations; identified third-party vendor risk and governance-documentation gaps as the material exposure.
- Produced dependency-sequenced remediation recommendations (application inventory, data-classification policy, breach-notification workflow) with explicit scope limitations separating evidenced gaps from unverifiable ones.

VulnScope — Web Vulnerability Scanner - [GITHUB](#)

Fall 2025

- Built a full-stack scanner running 16 passive, non-destructive checks aligned to the OWASP Top 10 (2021), covering TLS/HSTS/CSP, security headers, CORS, cookie flags, and injection and open-redirect indicators.
- Generated severity-ranked findings with evidence, CWE mapping, and remediation guidance; persisted scan history in SQLite and deployed on Render and GitHub Pages.

ADDITIONAL

Certifications & Training: Google IT Support Certification

Security Tools & Frameworks: Rapid7, Nessus, OpenVAS, Wazuh, SIEM, XDR, ServiceNow, NIST, CIS, MITRE ATT&CK, STRIDE, Python, R

Systems & Platforms: Linux, Windows, MacOS, AWS, Active Directory, Virtualization, GNS3

Technical Skills: Risk Management, Compliance, Audit, Microsoft Office, Penetration Testing, Threat Modeling, Technical Writing

Honors & Awards: National Honors Society, Dean's List '21-'24, Founder's Scholarship Society, WiCHacks Hackathon

Relevant Coursework: Risk Management, Information Security Policy, Database Systems, Operating Systems Security
